## Description

New 2026 Freighter Road Train Skel ready for serious container work. Built in Australia using Australian steel, designed to handle rigorous wharf loading conditions with a low tare, high payload focus. The low profile frame and wide spaced main beams help stability and centre of gravity, and the modular design makes servicing and accident repairs simpler. The chassis is sandblasted before priming for a stronger paint bond, and the tinted primer helps hide minor stone chips over time. Backed by Freighter Group's national dealer and service support network, plus a 2 year warranty. Freighter quality is also backed by major investment into advanced manufacturing, with over \$50 million spent upgrading the Ballarat facility into a modern, smart factory environment with state of the art equipment and software driven production control to lift build precision, consistency and throughput. This unit is optioned with HT Hendrickson airbag suspension with 10/285 parallel bearing axles Polished aluminium outer and machined aluminium inner wheels with Firestone 11R 22.5 tyres Three way twistlocks Blue plastic radius guards 50mm Ringfeder Combination long vehicle and road train signs WABCO EBS braking system Side loader pads Reversing beeper Standard and heavy duty 7 pin electrical sockets Hubometer fitted to centre axle Document holder on chassis Dual spare wheel carrier Pricing is subject to change. Photos are for illustration purposes only.
