Description

Here is your opportunity to secure a new 2026 TR33SCT Trout River Live Bottom trailer in a stock build slot. Colour selection and some specification changes can still be made for a limited time before final build. Trout River Live Bottom units unload via an internal conveyor belt, offering a safer and more versatile alternative to conventional tipping. They're ideal for sites with low structures and overhead obstacles, and are commonly used in hot mix asphalt, quarry and paving applications. Trout River quality is backed by Australian manufacturing and Freightier Group's ongoing investment into advanced production capability, focused on lifting build precision, consistency and overall finish. Typically fitted with a heat rated belt for asphalt work, an electric retractable tarp (can be changed to suit), insulated sides, WABCO SmartBoard, a 2 camera system, rear work lights, emergency stops on both sides, a tailgate lock indicator, a belt in motion indicator, a toolbox, alloy wheels, Hendrickson HT air bag suspension, and FUWA parallel bearing drum brake axles. Beyond this build, there's a huge range of options available and we can tailor a Trout River unit to your exact job, including different tarp and cover systems, insulation packages, lighting upgrades, extra cameras, toolboxes and storage layouts, additional indicators and safety options, weight gauges, water tanks, side underrun protection, specialised attachments, tailgate and door options, and different axle, suspension and braking packages. We also offer Trout River rigid body supply and installs, including full fitment and integration of hydraulics and electrics, set up to suit your truck and application. If you'd like to lock this one in or tailor a new build, let me know what you're carting, where it'll be working, and whether it's single or road train use. If you're looking at a rigid body install, please include your truck make and model plus any chassis dimensions and specs you can provide. Pricing is subject to change (final price confirmed at order and spec lock in). Photos are for illustration
