It features an extremely compact stabilization area with full side reach, including the ability to self level on steep sloped floors and terrain. In addition the S19 is also capable of setting up in narrow mode, with an even smaller footprint. This special feature allows reduced outreach, yet capable of full 360 rotation and full vertical height reach. Designed and built with a configuration of one lower riser pantograph and two-telescopic boom extensions, the S19 allows for 200kg basket load and 180 basket rotation, with up to 19m working height. Compact dimensions of 900mm W x 1,99m H allows access in virtually any work area. Equipped with a double stabilization area and articulated outriggers capable of raising the entire lift approximately 1.5m in height, allowing safer lift self loading onto a truck chassis, avoiding the need to use cumbersome loading and unloading ramps.
