The Reelmaster 5010-H utilises a Kubota 24.8 hp diesel engine in concert with an in-line motor generator and a self-recharging 48-volt battery pack to provide seamless power to the vehicle and cutting units. The combination of these two power sources comprises Toros patented hybrid power delivery system called PowerMatch. PowerMatch enables the Reelmaster 5010-H to match the power generated to the power required for all cutting conditions. The result is the availability of over 40 horsepower, but only when cutting conditions require it, which saves on average 20% fuel usage, improving operating costs, and the vehicles carbon footprint. -The Dual Precision Adjustment (DPA) cutting units - featuring Toros EdgeSeries reels combine to deliver a consistent, high quality cut and superior after cut appearance, while reducing maintenance with improved reel edge retention. -With Smart Power, E-Pedal traction drive control, switch-activated cruise control, electronically controlled hydrostatic pump and automatic, spring-applied parking brake, the Toro Reelmaster 5010-H delivers unsurpassed performance and unmatched quality of cut. -No hydraulics means no leaks on manicured lawns and less maintenance. -Crosstrax AWD -This is a very tidy, one owner unit that has been meticulously maintained its entire life -Purchased new in 2019 -Low 2365 PTO hours -2 Post ROPS w/canopy and overhead fan -Maximum cutting width of 100 inches. -The deck pivots and floats to the ground counter, to eliminate scalping because of its fully rollered design.
