Description

Aluminium Extra Strong Ramp Set – 3,000Kg Rated
The right ramps for the job. Every time.

3,000 kg rated aluminium ramps for loading heavy machinery, ride-on equipment, and vehicles. Lightweight enough to handle solo, strong enough for the load. Whether you're loading onto a flatbed, a plant trailer, or a beavertail, these ramps give you a solid, non-slip approach angle that doesn't flex underload.

Aluminium construction.
Strong, lightweight, corrosion-resistant. Won't rust in the rain or corrode from constant exposure to site conditions. Easy to clean.

3,000 kg rating.
Rated for the loads that matter — excavators, skid steers, ride-on mowers, ATVs, and heavy equipment. Check your machine's axle loading and confirm against the ramp rating before use.

In stock at A2B Trailers, Gosford NSW. Ask us about pairing these with the right Variant trailer for your application.
