Description

2026 Variant Car Trailer 2704 A4 – 2,700Kg
Drive it on. Drive it off. No ramps to wrestle.

Designed around how people actually move vehicles — cars, restoration projects, race cars, non-runners. The tilt deck drops to ground level so you drive straight on. Loading takes minutes, not half an hour of ramp positioning.

Tilt deck. Ground-level loading.
Vehicles with low ground clearance load without scraping. Non-runners can be winched on without a loading dock.

Mechanical overrun brakes — self-regulating, no controller required.

Hot-dip galvanised. Parabolic leaf spring suspension. LED lighting.
Built to handle the weight of vehicles and repeated loading cycles without corroding.

Danish-designed. RVSA 2023 compliant. Ready to register.
