## Description

Mulcher with swinging hammers rotor for excavators having a weight between 5,5 and 7,5 t. Designed for underbrush, grass and bushes. It comes equipped with a 27cc or optional 38cc hydraulic motor depending on the excavator used. Additional options include a 17cc or 34cc mechanically adjustable motor that makes this mulcher even more versatile and compatible with a wider range of excavators. The flow control valve allows easy mounting to the excavator without the need to adjust the flow (the valve will work automatically depending on the excavator). It can be equipped with flails or hammers for different types of applications. The standard equipment includes: -enclosed machine body -belt transmission -27cc gear motor with integrated anticavitation valve -hydraulic hoses -flow control system valve (only with 27 cc and 38 cc motors) -rear hood with mechanic adjustment -welded counter blade -rear roller -possibillity to have the rotor equipped with PML hammers or Y-fails Available on demand: 38cc gear motor with integrated anticavitation valve, 17/34cc variable manual displacement hydraulic piston motor with relief and anticavitation valve, customized attachment bracket, attachment plate with self leveling device, multiple tooth options.
