## Description

Mulcher with swinging hammers rotor for excavators having a weight between 3,5 and 5,5 t. Extremely versatile, compact machine. It comes equipped with a 16cc or optional 27cc hydraulic motor depending on the excavator used. Additional options include a 17cc or 34cc mechanically adjustable motor that makes this mulcher even more versatile and compatible with a wider range of excavators. The flow control valve allows easy mounting to the excavator without the need to adjust the flow (the valve will work automatically depending on the excavator). It can be equipped with flails or hammers for different types of applications. The standard equipment includes: -anti dust machine body -belt transmission -16cc gear motor with integrated anticavitation valve -hydraulic hoses -flow control system valve (only with 16 cc and 27 cc motors) -welded counter blade -rear roller -self levelling protection rubber -possibility to have the rotor equipped with PML hammers or Y-flails Available on demand: 27cc gear motor with integrated anticavitation valve, 17/34cc variable manual displacement hydraulic piston motor with relief and anticavitation valve, customized attachment bracket, attachment plate with self leveling device, mutiple tooth options.
