Description

Forestry mulcher with bite limiter technology. Special steel profiles limit the depth of blade action, reducing the demand for power, guaranteeing speed and exceptional performance. The BL2/EX/VT, designed for excavators from 8 to 14 t will mulch logs up to inches ir diameter. It has a hydraulic piston motor with VT (variable torque) automatic displacement, significantly improving performance, increasing torque when necessary, and minimizing rotor stalling conditions. The BL2/EX/VT has a rotor equipped with a heat-treated forged steel tooth holder, together with Type E reversible blades, and a standard hydraulic front hood. The hydraulic thumb is one of the available options, useful in managing and moving the material to be mulched to the ground. The standard equipment includes: -55/38cc variable torque hydraulic piston motor (100 140 L/min | 26 37 gal/min) -flow control system valve -diverter valve (plug in and play) -safety and anticavitation valve -motor enclosed in the frame -belt transmission -bulkhead for hydraulic connections -hydraulic front hood -Bite Limiter rotor Available on demand: dedicated rear hood (deflector), front fixed thumb bracked, hydraulic thumb, customized attachment bracket with pins, attachment plate with self levelling device, multiple tooth options.
